

The Vocational School of Professional Qualifications for Adults in Zgierz started its activities on September 1, 2014. This means that the School is a young educational institution whose offers are addressed to people with secondary education regardless of age. The post-secondary school is in the historical building which housed the Zgierz Teacher Training College which was dissolved in 2016 as part of national education policy and had professionally trained future teachers during the many years of its activity. The current professional level of the teaching and technical staff has also been maintained at the level of the European standards.

The mission of the Vocational School of Professional Qualifications for Adults in Zgierz is to create particularly favourable conditions for the development of competences and qualification of learners by providing knowledge, supporting innovation with simultaneous care for dignity and freedom of the world outlook.

The Schools currently offers courses implemented in 1 year or 2 year cycles in the following areas:

- administration and service, including: accounting technician, administration technician, occupational safety and health technician; cosmetic services technician;
- agro-forestry with environmental protection, including: floristry;
- tourism and catering, among others: technician of rural tourism;
- medico-social, among others: medical assistant, technician masseur, assistant to the disabled;

The school is also organises Qualifying Professional Courses for people who do not have a secondary education. Participation in these courses gives the opportunity to acquire new professional skills and/or improve your qualifications.

The Professional Vocational School employs qualified, competent, committed and responsible pedagogical staff: teachers, vocational training instructors and non-teaching vocational professionals. Such a triad of professional professionals results in very good results in external examinations giving professional qualifications.

The facility actively promotes its achievements and has already developed a good reputation in the environment in such a short time. It has a rich and extremely aesthetic teaching base - among others: computer labs, a premedical aid laboratory, specialist laboratories for practical classes in the fields of Masseur technician, Cosmetic service technician, Medical carer, Floristry. It has didactic rooms with full audiovisual facilities, an auditorium and a library.

The location of the School, with the total area of 1.6 ha including 3,600 sq m of the building, is customer friendly. The proximity of the main railway station, tram and bus stops and a car park, which is monitored 24 hours a day, make it easy to arrive to meetings in time.
